STL Tech Jobs
REPORT

**AN ANNUAL REVIEW
OF TECH OPPORTUNITY
IN GREATER ST. LOUIS**

TechSTL.com
info@TechSTL.com

FINDINGS

KEY FINDINGS

on the state of tech in St. Louis

2

As the world continues to navigate an economic transition resulting from the COVID-19 pandemic, Greater St. Louis has found itself in the midst of a regional transformation that is generating a refreshing shift towards growth & opportunity. TechSTL, the newly established Tech Council serving the 15-county bi-state region of the Greater St. Louis Metropolitan Statistical Area (MSA), conducted a series of surveys & research efforts to release the first STL Tech Jobs Report. The 2022 Key Findings were:

1. Greater St. Louis tech demand is **bouncing back** even stronger with 33% growth in job ads posted since 2021
2. Ranked 16th in the country for talent migration, St. Louis is **highly attractive** to rising tech talent & young families
3. Currently operating at 65% capacity, the St. Louis tech talent pipeline has **immediate opportunity** to engage

In the 2022 STL Tech Jobs Report, TechSTL offers a snapshot into the past twelve months of open job postings, compared to the same data collected over the past five years from JobsEQ Labor Market Research. In addition, TechSTL conducted a Tech Workforce Survey with partners to map the tech talent pathways and determine the 2022 capacity of the tech talent pipeline.

We recognize that while this data helps to shine a light on the current state of tech opportunity in St. Louis, there is still

a long way to go to monitor the health of the data economy in our MSA. With your help TechSTL can continue to grow St. Louis tech.

RECOVERY

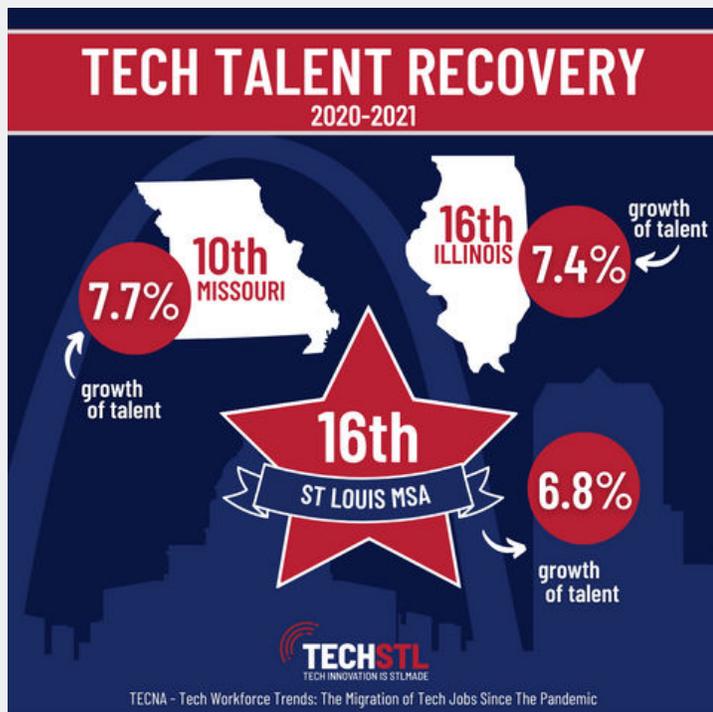

TALENT RECOVERY

through remote work & migration

3

Remote work continued to increase in 2022, the most in tech positions. According to the TECNA National Workforce Study, released in May 2022, "remote job postings in tech occupations are more than 3x the rate of remote postings across all sectors, increasing 421% from pre-pandemic levels. This does not appear to be slowing, and early indications are that it will continue to grow."

When looking at 2020-2021, Missouri was ranked 10th in the nation for talent growth with a 7.7% increase due to migration, while Illinois saw an increase of 7.4% which placed it at 16th. The St. Louis Metropolitan Statistical Area (MSA) also came in as the 16th-ranked metro in the country with a talent growth of 6.8%.

GROWTH RATE

GROWTH RATE

of St. Louis tech occupations

Technology jobs are often high-quality, high-paying, resilient occupations, with the data economy of St. Louis certainly demonstrating its ability to bounce back after the COVID-19 global pandemic. With a **33% increase** in active job postings across the MSA from 2021 - 2022, the regional tech workforce is experiencing healthy returns as the economy adjusts to the recent shifts in hybrid engagement models and an increased demand for high-tech skills. While the average annual salaries of the St. Louis tech occupations are competitive compared to other tech hubs, we are still on the lower range of that spectrum, making it difficult for our regional companies to consistently attract and retain top talent. However, with an extremely competitive cost of living making St. Louis one of the most affordable cities in America, our region is proving to be highly attractive to rising professionals and young families looking for a well-rounded lifestyle.

PIPELINE

TALENT PIPELINE

of St. Louis tech occupations, 2022

12

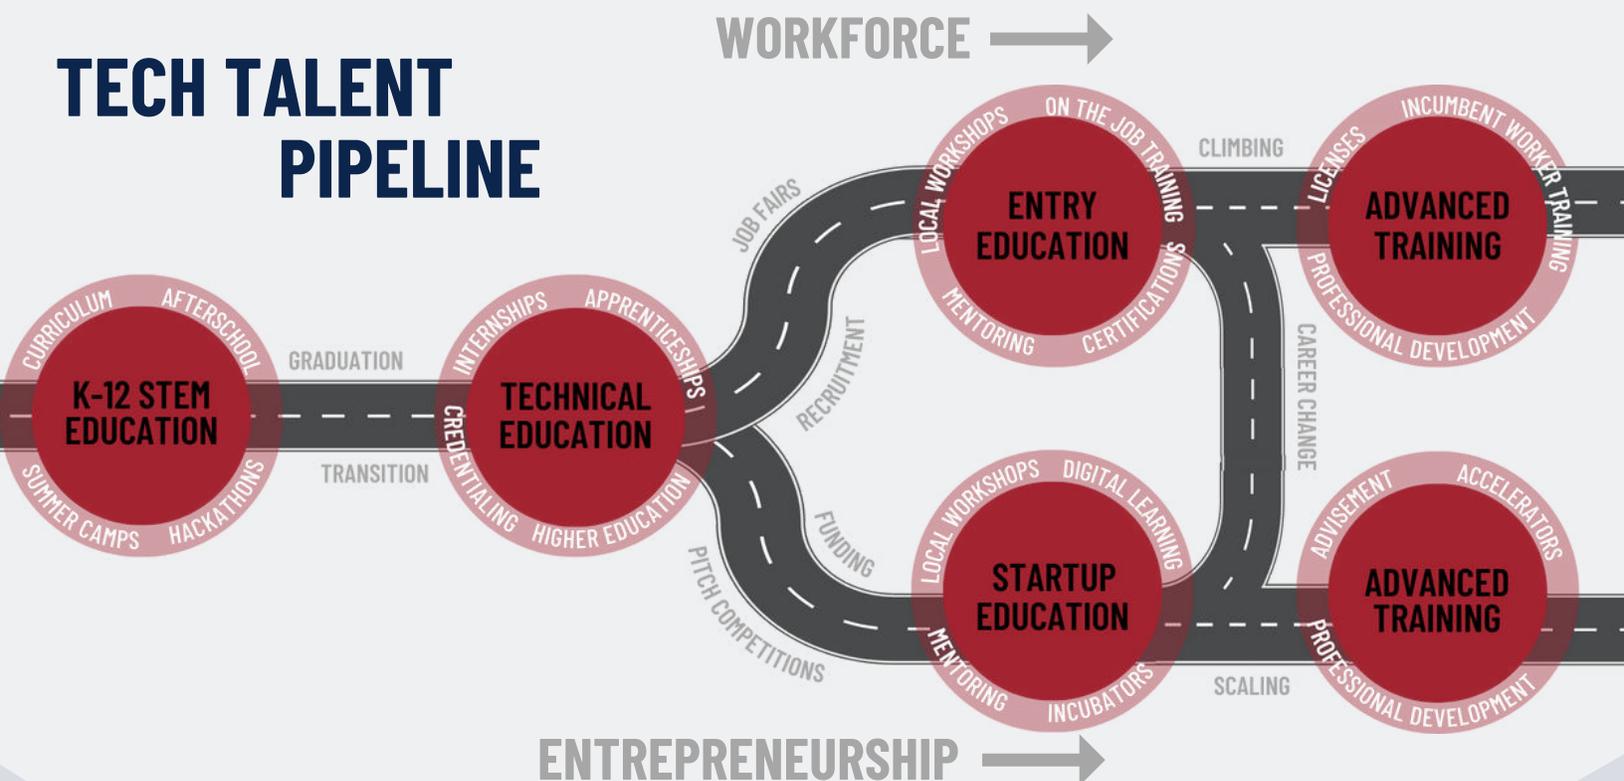

A healthy tech talent pipeline is a critical component of any growing city and St. Louis has several clear pathways that develop its tech workforce. TechSTL is committed to not only growing the capacity of the pipeline, but also the diversity and accessibility to ensure innovation is inclusive in St. Louis. In order to improve the overall health of the pipeline, we must first start with mapping and measuring the current state of all pathways, including the Big 15 Emerging Technologies.

In the fall of 2022, TechSTL conducted a Tech Workforce Survey of Hiring Partners, Training Partners, and Higher Education Institutions. The goal of the survey was to identify the top pathways and determine the current capacity of the pipeline. We found that at 65% capacity, there is immediate opportunity to engage 35% more and diverse talent in our tech pipeline.
